Quilia

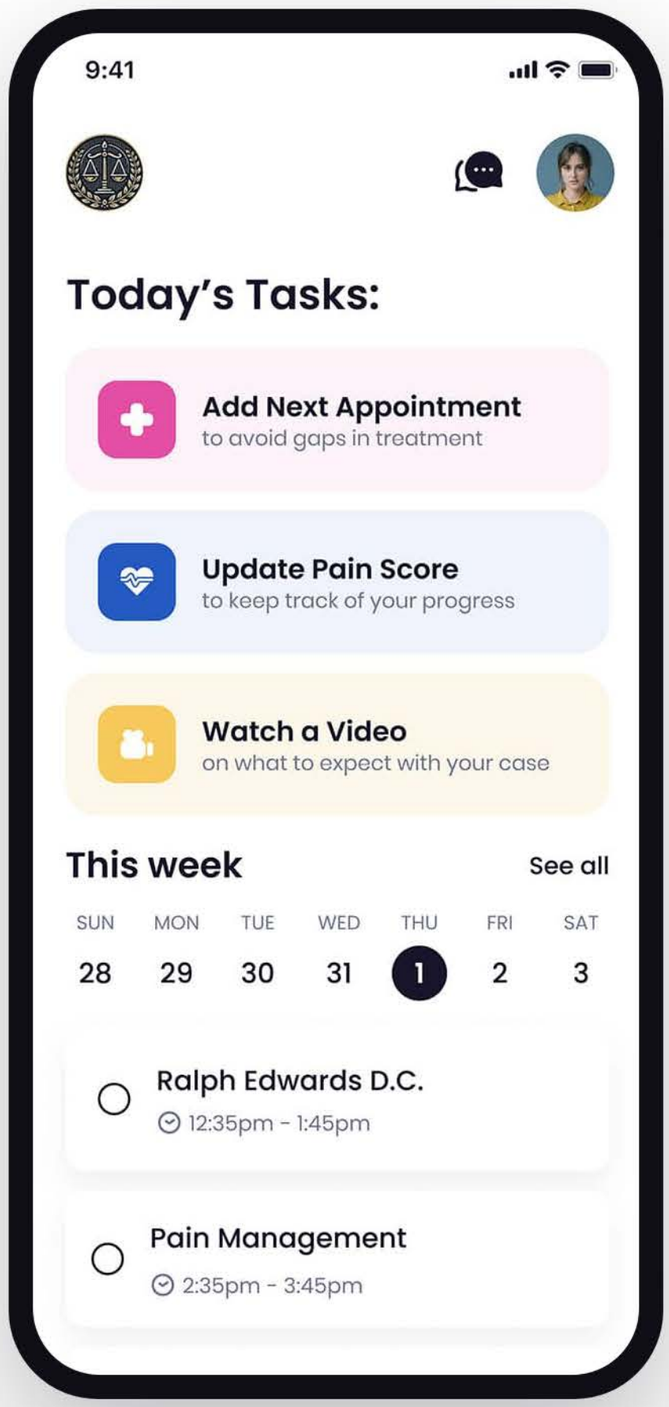

CLIENT GUIDE

Getting started with Quilia

Quilia is how you stay connected to your legal team. Here is everything you need to get set up — it takes about two minutes.

Set up the app

1. Open the text or email from your firm and tap the link to get started.
2. Download the app — tap the option for your phone (Apple or Android) and install it like any other app. It is free.
3. **Log in with your phone number or email.** Enter the same one you gave your firm, then agree to the terms.
4. Enter the verification code we send you — by text or email, matching how you signed in. No password to remember.
5. **You are connected.** Message your legal team, upload documents and photos, and keep them updated on your treatment and appointments.

The two things to focus on

Do the items on your Home tab, and take a picture of everything to do with your case — bills, letters, your injuries, the scene. Do those two things and we will help you with the rest.
